

Custom drawing machines from Smartplay put Israeli Lottery on the road

EDGEWATER PARK, NJ (January 10, 2010) - When Israel's lottery, Mifal Ha'payis, wanted to take their show on the road, Smartplay answered the demand for travel-sized drawing machines! Smartplay President David Michaud and Mifal Ha'payis representative Oded Kalina collaborated on a miniature version of Smartplay's Multi Digit Gem 6 and Saturn. The two completed Multi Digit Gem have six chambers, each mixing ten balls, and operated by automatic remote control. They are also equipped with customized protective travel cases to simplify transporting the machines to various locations.

In addition to miniature Multi Digit Gem, Israel also requested six custom-sized Saturn drawing machines with smaller chambers. Two miniature Saturns were delivered with 46 centimeter-chambers, able to mix 50 balls and select 8. Four additional Saturns are even smaller, with a chamber diameter of 36 centimeters, mixing 20 balls. Israel also ordered security coded numbered ping pong balls especially for their traveling machines, as well as protective travel cases.

Mifal Ha'payis intends to use these intriguing, newly-designed draw machines to demonstrate their weekly drawings to curious players and to the general public on the road.

Oded Kalina, Technical Support Manager, and Oved Hazan, Director of Drawing and Payouts, from Mifal Ha'payis, Israel's lottery, visited Smartplay's New Jersey office in
